

RISO RZ 370

RISO RZ 370

Affordable top-quality printing
A3 size print image at 130 cpm
D600 dpi High resolution

Optional Accessories for greater versatility and functionality	
Ink/master holder	Neat, convenient storage of ink and masters.
Color drum	A wide variety of colors is available. Drums can be stored in their own case.
Auto document feeder AF-V	Automatic feed up to min 50 sheets of originals
Job separator IV:N	Allows the machine to print and sort into groups separated by tape.
Key card counter IV:N	Helps manage costs by showing number of copies printed and masters used in a given time period.
Special paper feed kit	Allows use of thicker stock such as cards and envelopes.
Stand	Sturdy stand also offers convenient storage of consumables.
Printer control board RISORINC3N	Allows direct connection of a computer via a parallel cable.
Network interface card RISORINC-NET	Gives the printer network connection. Comes bundled with RISO-MONITOR remove printer-monitoring software.
Consumables (SoyInk) RISO INK Z type / RISO MASTER Z type	

RZ370 Specifications

Master-making / printing methods	High-speed digital master-making/full automatic stencil printing
Original Type	Book (10kg or less), sheet, Digital Format (optional)
Print Speed	Approx. 60-130 sheets per minute (five steps variable)
Original Paper Weight	When using the Stage Glass: 10kg or less
Print Paper Size (max./min.)	100mm x 148mm - 297mm x 432mm (A6 to A3 plus)
Consumables a. Ink Refill (Automatic)	Transparent Cartridge of 1000 cc/ml Z type ink
b. Master Supply	Full automatic (approx. 220 sheets-A3 master per roll)
Master Disposal Capacity	Min 100 sheets
Master Ejection (Auto)	Patented master ejection system
Master Loading System	Patented front master loading system without master flanges
Ink Saving Mode	35% reduction of ink consumption without sacrificing much of print quality
Colour Ink/Multispot Color Printing	20 standard Colours All Pantone® colour & all other unlimited special colour upon request.
Image Processing Mode	Line, Photo, Duo, Pencil
Paper Supply Capacity	1000 sheets
Print Paper Weight	46 g/m ² - 210 g/m ²
Resolution	D600dpi
Master-making Time	Approx. 16 seconds (for A4/landscape/100% reproduction ratio)
Printing Area (max.)	291mm x 413mm (A3 size)
Print Reproduction Ratio	Zoom: 50% - 200% (1 % increment) Standard reproduction ratio (enlargement) : 141%, 122%, 116% Standard reproduction ratio (reduction) : 94%, 87%, 82%, 71%
Print Position Adjustment	Vertical : ±15mm Horizontal : ±10mm
User Interface	LED panel with Progress arrow indicators, front-side operation
Network Protocol	Ether Talk, TCP/IP, Net BEUI, Net BIOS, DHCP, HTTP, FTP, SNMP, APPLETALK
Ethernet Type	10 Base-T/100 Base-TX
Built in Network Utility	RISO ADMIN (Network Admin Tool) RISO Print (Printer Port Creating Tool) RISO Monitor (Network Monitoring Tool)
Operating System	Windows 95/98, Windows NT, Windows 2000, MAC OS 7.5, 7.6, 8.1, 8.5, 8.6, 9, 10
Network protocol: OS Connection	parallel/LAN (local); serial (remote)
CPU/Memory	32 bit (133 MHz)/DRAM 64MB or better
Remote Utility	RISORINC manager (Multi Address Transfer/Multi File Transfer, Scheduled Transfer)
Energy consume in power saving mode	2 W
Energy Saving Mode	Auto Power off mode, Auto Sleep mode
Features	Auto-process, 2-up printing, Book shadow edit, Programmed printing, Auto idling, Manual idling, Custom setting mode, Confidential mode, Corrugator, Paper jumping wing adjustment, Paper arranger
Power Source	110V - 120V AC, 50/60Hz <2.5A> 220V - 240V AC, 50/60Hz <1.3A>
Dimensions (WxDxH) without stand	When in use : 1380mm (W) x 645mm (D) x 660mm (H) When in storage : 775mm (W) x 645mm (D) x 660mm (H)
Weight without stand	Approx. 100kg

Specifications are subject to change without notice. Details may vary depending on the continent. RISO Digital Copy Printer and consumables are produced by RISO Kagaku Corporation, Japan through an integrated manufactures system that ensure stable quality and high level of performance.

Top-quality D600dpi , A3 size printing

Advanced RISO technology brings unprecedented print quality to a truly affordable printer. Thanks to D600dpi resolution, lines are smoother, photos and gradations are more natural, and even the smallest typeface is clear and legible. And that's just part of the story, because the RZ370 series are packed with cutting-edge RISO features such as the RISO i Quality System to assure you of the very best performance possible from your RISO printer, with real-time adjustment of print parameters for optimum print quality, automatically.

RISO RZ370 series printers are the affordable way to superb high-speed printing quality. Revolutionary D600dpi resolution gives all your documents a truly professional look while 130cpm speed gets the job done fast.

Front operation

Thoughtful design makes loading masters and swapping print drums light and easy. The printer's front section opens wide and the master making unit pulls out like a drawer, allowing easy placement of a fresh master roll. Print drums are 25% lighter than previous models allowing anyone to quickly and easily load a print drum of a different color.

No master flanges

To make loading master rolls even easier, the previous design that required placement of flanges on the master roll is replaced with an integrated system that automatically holds the master in place.

Easy ink setting

Setting a new ink bottle is little more than a one-click operation. Simply insert the bottle, twist into place and close the printer door. It's all part of RISO's "clean hands" operating policy.

Advantages over a copier
 Low operating costs / High speed printing
 High durability design / Simple operating panel
 Versatile paper handling / Multiple colors available
 Printing speed at 130 copies per minute A3

Progress arrows

These provide visual confirmation of progress in master-making and print jobs so you always know where you are in the process.

Enlarging and reducing the print area of masters

Seven-step adjustment allows you to enlarge (three steps) or reduce (four steps) standard-size originals to another standard paper size. You can also use it to adjust margins around your original. Zoom mode allows you to enlarge or reduce your original from 50% to 200% in 1% increments for total control or special effects.

Scanning level adjustment

Five step scanning level adjustment allows you to adjust the scanner to match the density of your original. An auto position is also available.

Energy saving mode

Lowers running costs by automatically turning the printer off or placing it in sleep mode after a user-selected period without operation. Choose from 5, 15, 30, 60 or 90-minute periods without operation before the printer turns off or enters sleep mode.

Fast printing speed

RISO printers are known for their speed, and the RZ370 series get the job done even faster with a higher maximum print speed of 130 A3 copies per minute.

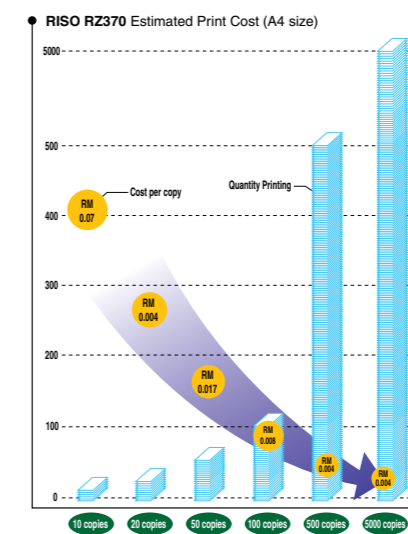

Print density adjustment

Five-step print density adjustment gives you fine control of output print density, assuring you of complete control of the look of your printed documents.

Vertical print position adjustment

This lets you shift the vertical position of the print area by ±15mm allowing precise placement of print / image on the output.

Cost Saving

RISO iQuality System™

The RISO i Quality System offers a large number of quality and convenience benefits. Among them are:

- Automatic assurance of optimum print quality.
- Prevention of operator error.
- Warning of shortages in remaining ink/master volume.
- Minimized paper waste.

The RISO i Quality mark indicates a RISO product compatible with the RISO i Quality System.

Color

Unlimited multi spot color printing inclusive all pantone® color

SOY INK :
 An Environmentally Friendly Printing Ink,
 Fresh from the field.

RISO's high quality soy ink RISO SOYINK

- RISO SOYINK is an environmentally friendly ink containing soy oil.
- RISO SOYINK de-inks easily, making printed paper easier to recycle and so helping to save water and energy. It also helps to keep the magnitude of recycled paper whiteness.
- RISO SOYINK is biodegradable and returns easily to nature.
- The non toxic ink is not hazardous to machine operator who is handling it.
- RISO SOYINK is not harmful to the skin.
